SBS iT

Business IT Support & Consultancy

ASK US ABOUT OUR PROMOTIONS

Making IT Work for You

SBS IT deliver 1st class support and consultancy services to small and medium sized businesses throughout the UK. Utilising cloud technologies we enable businesses to drive agility and efficiencies. **SBS IT** can provide managed services and work as your service desk with on demand support and resources as required.

We have a broad range of skills covering all areas of IT from the desktop to the server to the cloud. We can be an extension of your business as your IT department or complement your existing one from additional resource to holiday cover.

Consultancy services are available for advice, best practice or project lead discussions. We have a team available to talk to for all IT requirements.

MANAGED SERVICES

Businesses of all sizes face an increasingly competitive environment complicated by advances in big data, social media and mobile technologies. You want to keep your business running smoothly and securely while taking advantage of the best that modern IT can offer. With our deep expertise in support, cloud and networking services we can help you boost efficiencies while driving down risk and cost.

SBS IT can help you:

- **Monitor apps and network performance** across the cloud, on-premise infrastructure and devices.
- **Grow more efficiently** through turnkey management solutions.
- **Focus on building your business** instead of managing network infrastructure.
- **Meet demands** for new capabilities such as video conferencing and other real-time communications.
- **Scale out quickly and affordably** with pay-as-you-go cloud services.
- **Get the most from your network infrastructure** without increasing labour and training costs.

CLOUD SERVICES

Cloud services enable agility and scalability without the upfront cost of owning the solution, with availability from anywhere at anytime on any device. No more waiting for support services to enable features or create accounts. Cloud services are self service solutions that make it easier to do business.

SMBs using cloud services grow 26 percent faster and are 21 percent more profitable.*

VERY COMPETITIVE RATES

BACKUPS

Ensuring your data is protected is critical to any business. Ensuring your data is recoverable in the event of deletion or other form of loss is key to keeping your business running. **SBS IT** can advise and help with numerous backup options, from on premise solutions to cloud backup and replication.

- *Does your business have a backup solution?*
- *Have you tested the recovery success of your backups to ensure your data is protected?*
- *What would happen if you lost your business data with no recovery options?*

Central Croydon Service Desk

BUSINESS CONTINUITY/DISASTER RECOVERY (BC/DR)

BC and DR are closely linked but separate policies for ensuring that the business can continue to operate during an unexpected event and can recover in the event of a complete disaster.

SBS IT can advise and work with you to review and plan your existing policies or create new ones from scratch.

Business Continuity and Disaster Recovery are two plans akin to insurance, it's better to have them and not need them than to need them and not have them.

Central Croydon Service Desk

WI-FI

Wireless networks are now a key piece of business infrastructure and the convenience a wireless network provides needs to be managed. Strategic placement of access points can reduce the number of devices needed to provide full coverage for a site making a solution cheaper.

A wireless network can provide segregated networks for guests without compromising security or an access portal for redeeming vouchers for internet access.

SBS IT can help you deploy and manage a wireless network that meets your current needs and for the future.

SECURITY

IT security is a requirement for all businesses. As more and more data is created and stored digitally the need to make it available when you want it is important. There are several factors to consider around IT security which **SBS IT** can help you with from advice to policy to hardware and software solutions.

IT Security isn't just an install and forget solution, it also needs human understanding.

Talk to us today about how we can help.
